¹ Weighted average total yield of the portfolio at fair value. Calculated based on the interest rate and the accretion of OID. OID represents OID earned on the investment by Blue Owl. Separately, a Blue Owl adviser may engage in certain origination activities and receive attendant arrangement, structuring or similar fees. As such OID could have been higher had the Blue Owl Advisers not collected this fee. ² For non-stated rate income producing investments, computed based on (a) the dividend or interest income earned for the respective trailing twelve months ended on the measurement date, divided by (b) the ending fair value. In instances where historical dividend or interest income data is not available or not representative for the trailing twelve months ended, the dividend or interest income is annualized.

¹ Borrower financials are as of the latest available, typically a quarter in arrears. Excludes certain investments that fall outside of our typical borrower profile. Includes portfolio companies representing 87.4% of our total debt portfolio based on fair value as of 12/31/23 and 84.5% as of 9/30/23. ² Weighted average total yield of the portfolio at fair value. Calculated based on the interest rate and the accretion of OID. Does not represent investor returns, as total portfolio yield does not reflect effects of costs and leverage. For non-stated rate income producing investments, computed based on (a) the dividend or interest income earned for the respective trailing twelve months ended on the measurement date, divided by (b) the ending cost or fair value. In instances where historical dividend or interest income data is not available or not representative for the trailing twelve months ended, the dividend income is annualized. ³ "Net LTV" represents the net ratio of "loan to value" for each portfolio company, weighted based on the fair value of OBDC II's loan investment. The "attachment point" is the principal amount of debt that is senior to OBDC II's loan investment, and that amount plus the principal amount of the loan in which OBDC II invested and other equally ranked debt is the "last dollar" amount. "Value" represents an estimate of enterprise value of each portfolio company, a calculation that will vary by portfolio company.

Internal Rating	Definition
1	The borrower is performing above expectations, and the trends and risk factors for this investment since origination or acquisition are generally favorable
2	The borrower is generally performing as expected and the risk factors are neutral to favorable. All investments or acquired investments in new portfolio companies are initially assessed a rating of 2
3	The borrower is performing below expectations and the loan's risk has increased somewhat since origination or acquisition
4	The borrower is performing materially below expectations and the loan's risk has increased materially since origination or acquisition. In addition to the borrower being generally out of compliance with debt covenants, loan payments may be past due (but generally not more than 120 days past due)
5	The borrower is performing substantially below expectations and the loan's risk has increased substantially since origination or acquisition. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. Loans rated 5 are not anticipated to be repaid in full and we will reduce the fair market value of the loan to the amount we anticipate will be recovered

Risk Factors

An investment in Blue Owl Capital Corporation II (“OBDC II”) is speculative and involves a high degree of risk, including the risk of a substantial loss of investment, as well as substantial fees and costs, all of which can impact an investor’s return. The following are some of the risks involved in an investment in OBDC II’s common shares; however, an investor should carefully consider the fees and expenses and information found in the “Risk Factors” section of the OBDC II prospectus before deciding to invest:

You should not expect to be able to sell your shares regardless of how OBDC II performs and you should consider that you may not have access to the money you invest for an indefinite period of time. An investment in shares of OBDC II’s common stock is not suitable for you if you need access to the money you invest.

OBDC II does not intend to list its shares on any securities exchange and does not expect a secondary market in its shares to develop. As a result, you may be unable to reduce your exposure in any market downturn. If you are able to sell your shares before a liquidity event is completed, you will likely receive less than your purchase price.

OBDC II has implemented a share repurchase program pursuant to which it intends to conduct quarterly repurchases of a limited number of outstanding shares of its common stock. OBDC II’s board of directors has complete discretion to determine whether OBDC II will engage in any share repurchase, and if so, the terms of such repurchase. OBDC II’s share repurchase program will include numerous restrictions that limit your ability to sell your shares. As a result, share repurchases may not be available each month. While OBDC II intends to continue to conduct quarterly tender offers as described above, it is not required to do so and may suspend or terminate the share repurchase program at any time.

Distributions on OBDC II’s common stock may exceed OBDC II’s taxable earnings and profits, particularly during the period before it has substantially invested the net proceeds from its public offering. Therefore, portions of the distributions that OBDC II pays may represent a return of capital to you for U.S. federal tax purposes. A return of capital is a return of a portion of your original investment in shares of OBDC II common stock. As a result, a return of capital will (i) lower your tax basis in your shares and thereby increase the amount of capital gain (or decrease the amount of capital loss) realized upon a subsequent sale or redemption of such shares, and (ii) reduce the amount of funds OBDC II has for investment in portfolio companies. OBDC II has not established any limit on the extent to which it may use offering proceeds to fund distributions.

Distributions may also be funded in significant part, directly or indirectly, from (i) the waiver of certain investment advisory fees, that will not be subject to repayment to the Adviser and/or (ii) the deferral of certain investment advisory fees that may be subject to repayment to the Adviser and/or (iii) the reimbursement of certain operating expenses, that will be subject to repayment to the Adviser and its affiliates. Significant portions of distributions may not be based on investment performance. In the event distributions are funded from waivers and/or deferrals of fees and reimbursements by OBDC II’s affiliates, such funding may not continue in the future. If OBDC II’s affiliates do not agree to reimburse certain of its operating expenses or waive certain of their advisory fees, then significant portions of OBDC II’s distributions may come from offering proceeds or borrowings. The repayment of any amounts owed to OBDC II’s affiliates will reduce future distributions to which you would otherwise be entitled.

The payment of fees and expenses will reduce the funds available for investment, the net income generated, the funds available for distribution and the book value of the common shares. In addition, the fees and expenses paid will require investors to achieve a higher total net return in order to recover their initial investment. Please see OBDC II’s prospectus for details regarding its fees and expenses.

OBDC II intends to invest in securities that are rated below investment grade by rating agencies or that would be rated below investment grade if they were rated. Below investment grade securities, which are often referred to as “junk,” have predominantly speculative characteristics with respect to the issuer’s capacity to pay interest and repay principal. They may also be illiquid and difficult to value.

The Adviser and its affiliates face a number of conflicts with respect to OBDC II. Currently, the Adviser and Its affiliates manage other investment entities, including Blue Owl Capital Corporation and Owl Blue Owl Capital Corporation II, and are not prohibited from raising money for and managing future investment entities that make the same types of investments as those OBDC II targets. As a result, the time and resources that the Adviser devotes to OBDC II may be diverted. In addition, OBDC II may compete with any such investment entity also managed by the Adviser for the same investors and investment opportunities. Furthermore, the Adviser may face conflicts of interest with respect to services it may perform for companies in which OBDC II invests as it may receive fees in connection with such services that may not be shared with OBDC II.

The incentive fee payable by OBDC II to the Adviser may create an incentive for the Adviser to make investments on OBDC II’s behalf that are risky or more speculative than would be the case in the absence of such compensation arrangements. OBDC II may be obligated to pay the Adviser Incentive fees even if OBDC II incurs a net loss due to a decline in the value of its portfolio and even if its earned interest income is not payable in cash.

All investments are subject to risk, including the loss of the principal amount invested. These risks may include limited operating history, uncertain distributions, inconsistent valuation of the portfolio, changing interest rates, leveraging of assets, reliance on the investment advisor, potential conflicts of interest, payment of substantial fees to the investment advisor and the dealer manager, potential illiquidity, and liquidation at more or less than the original amount invested. Diversification will not guarantee profitability or protection against loss. Performance may be volatile, and the NAV may fluctuate.
