Risk Factors

An investment in Blue Owl Credit Income Corp. ("OCIC") is speculative and involves a high degree of risk, including the risk of a substantial loss of investment, as well as substantial fees and costs, all of which can impact an investor's return. The following are some of the risks involved in an investment in OCIC's common shares; however, an investor should carefully consider the fees and expenses and information found in the "Risk Factors" section of the OCIC prospectus before deciding to invest:

You should not expect to be able to sell your shares regardless of how OCIC performs, and you should consider that you may not have access to the money you invest for an indefinite period of time. An investment in shares of OCIC's common stock is not suitable for you if you need access to the money you invest.

OCIC does not intend to list its shares on any securities exchange and does not expect a secondary market in its shares to develop. As a result, you may be unable to reduce your exposure in any market downturn. If you are able to sell your shares before a liquidity event is completed, you will likely receive less than your purchase price.

OCIC has implemented a share repurchase program pursuant to which it intends to conduct quarterly repurchases of a limited number of outstanding shares of its common stock. OCIC's board of directors has complete discretion to determine whether OCIC will engage in any share repurchase, and if so, the terms of such repurchase. OCIC's share repurchase program will include numerous restrictions that may limit your ability to sell your shares. As a result, share repurchases may not be available each month. While OCIC intends to continue to conduct quarterly tender offers as described above, it is not required to do so and may suspend or terminate the share repurchase program at any time.

Distributions on OCIC's common stock may exceed OCIC's taxable earnings and profits, particularly during the period before it has substantially invested the net proceeds from its public offering. Therefore, portions of the distributions that OCIC pays may represent a return of capital to you for U.S. federal tax purposes. A return of capital is a return of a portion of your original investment in shares of OCIC common stock. As a result, a return of capital will (i) lower your tax basis in your shares and thereby increase the amount of capital gain (or decrease the amount of capital loss) realized upon a subsequent sale or redemption of such shares, and (ii) reduce the amount of funds OCIC has for investment in portfolio companies. OCIC has not established any limit on the extent to which it may use offering proceeds to fund distributions.

Distributions are not guaranteed. Distributions may also be funded in significant part, directly or indirectly, from (i) the waiver of certain investment advisory fees, that will not be subject to repayment to the Adviser and/or (ii) the deferral of certain investment advisory fees that may be subject to repayment to the Adviser and/or (iii) the reimbursement of certain operating expenses, that will be subject to repayment to the Adviser and its affiliates. Significant portions of distributions may not be based on investment performance. In the event distributions are funded from waivers and/or deferrals of fees and reimbursements by OCIC's affiliates, such funding may not continue in the future. If OCIC's affiliates do not agree to reimburse certain of its operating expenses or waive certain of their advisory fees, then significant portions of OCIC's distributions may come from offering proceeds or borrowings. The repayment of any amounts owed to OCIC's affiliates will reduce future distributions to which you would otherwise be entitled.

The payment of fees and expenses will reduce the funds available for investment, the net income generated, the funds available for distribution and the book value of the common shares. In addition, the fees and expenses paid will require investors to achieve a higher total net return in order to recover their initial investment. Please see OCIC's prospectus for details regarding its fees and expenses.

OCIC intends to invest in securities that are rated below investment grade by rating agencies or that would be rated below investment grade if they were rated. Below investment grade securities, which are often referred to as "junk," have predominantly speculative characteristics with respect to the issuer's capacity to pay interest and repay principal. They may also be illiquid and difficult to value.

The Adviser and its affiliates face a number of conflicts with respect to OCIC. Currently, the Adviser and its affiliates manage other investment entities, including Blue Owl Capital Corporation and Blue Owl Capital Corporation II, and are not prohibited from raising money for and managing future investment entities that make the same types of investments as those OCIC targets. As a result, the time and resources that the Adviser devotes to OCIC may be diverted. In addition, OCIC may compete with any such investment entity also managed by the Adviser for the same investors and investment opportunities. Furthermore, the Adviser may face conflicts of interest with respect to services it may perform for companies in which OCIC invests as it may receive fees in connection with such services that may not be shared with OCIC.

The incentive fee payable by OCIC to the Adviser may create an incentive for the Adviser to make investments on OCIC's behalf that are risky or more speculative than would be the case in the absence of such compensation arrangements. OCIC may be obligated to pay the Adviser Incentive fees even if OCIC incurs a net loss due to a decline in the value of its portfolio and even if its earned interest income is not payable in cash.

The information provided above is not directed at any particular investor or category of investors and is provided solely as general information about Blue Owl Capital Inc.'s products and services to regulated financial intermediaries and to otherwise provide general investment education. No information contained herein should be regarded as a suggestion to engage in or refrain from any investment-related course of action as Blue Owl Securities LLC, its affiliates, and OCIC are not undertaking to provide impartial investment advice, act as an impartial adviser, or give advice in a fiduciary capacity with respect to the materials presented herein.

As of 3/31/2025. ¹ Distribution payments are not guaranteed. Blue Owl Credit Income Corp. may pay distributions from sources other than cash flow from operations, including, without limitation, the sale of assets, borrowings, return of capital or offering proceeds, and advances or the deferral of fees and expense reimbursements. The annualized distribution rate shown is calculated by multiplying the sum of the last three base distributions per share paid and special distribution per share paid by four and dividing the result by the NAV per share of the month ending the relevant three-month period. Excluding special dividends, the Fund declared an annualized distribution amount of \$0.84 per share for Class I, \$0.82 per share for Class D, and \$0.76 per share for Class S, resulting in annualized distribution rates of 8.9% for Class I shares, 8.6% for Class D shares, and 8.0% for Class S shares based on the last reported NAV. The annualized distribution rate shown may be rounded and is net of applicable servicing fees. (Class I: No servicing fee, Class D: 0.25%, Class S: 0.85%.) The payment of future distributions is subject to the discretion of OCIC's board of directors and applicable legal restrictions, therefore there can be no assurance as to the amount or timing of any such future distributions. Distributions are not guaranteed. Up to 100% of distributions have been funded and may continue to be funded by the reimbursement of certain expenses that are subject to repayment to the Adviser of OCIC. Such waivers and reimbursements by the Adviser may not continue in the future. For further information, please see our SEC filings at www.sec.gov. ² The amount available reflects limitations related to each credit facility's borrowing base. ³ Net of cash.

1. Weighted average total yield of the portfolio at fair value. Calculated based on the interest rate and the accretion of OID. OID represents OID earned on the investment by a Blue Owl. Separately, a Blue Owl adviser may engage in certain origination activities and receive attendant arrangement, structuring or similar fees. As such OID could have been higher had the Blue Owl Advisers not collected this fee. **2.** For non-stated rate income producing investments, computed based on (a) the dividend or interest income earned for the respective trailing twelve months ended on the measurement date, divided by (b) the ending fair value. In instances where historical dividend or interest income data is not available or not representative for the trailing twelve months ended, the dividend or interest income is annualized.

Calculated based on the interest rate and the accretion of OID. Does not represent investor returns, as total portfolio yield does not reflect effects of costs and leverage. For non-stated rate income producing investments, computed based on (a) the dividend or interest income earned for the respective trailing twelve months ended on the measurement date, divided by (b) the ending cost or fair value. In instances where historical dividend or interest income data is not available or not representative for the trailing twelve months ended, the dividend income is annualized. ³. "Net LTV" represents the net ratio of "loan to value" for each portfolio company, weighted based on the fair value of OCIC's loan investment. The "attachment point" is the principal amount of debt that is senior to OCIC's loan investment, and that amount plus the principal amount of the loan in which OCIC invested and other equally ranked debt is the "last dollar" amount. "Value" represents an estimate of enterprise value of each portfolio company, a calculation that will vary by portfolio company.

1	The borrower is performing above expectations, and the trends and risk factors for this investment since origination or acquisition are generally favorable
2	The borrower is generally performing as expected and the risk factors are neutral to favorable. All investments or acquired investments in new portfolio companies are initially assessed a rating of 2
3	The borrower is performing below expectations and the loan's risk has increased somewhat since origination or acquisition
4	The borrower is performing materially below expectations and the loan's risk has increased materially since origination or acquisition. In addition to the borrower being generally out of compliance with debt covenants, loan payments may be past due (but generally not more than 120 days past due)
5	The borrower is performing substantially below expectations and the loan's risk has increased substantially since origination or acquisition. Most or all of the debt covenants are out of compliance and payments are substantially delinquent. Loans rated 5 are not anticipated to be repaid in full and we will reduce the fair market value of the loan to the amount we anticipate will be recovered
